### III. DISSERTATION PROJECTS

The TMUS Dissertation Projects usually are undertaken after successful completion of the first semester of study at CU. Students must have passed all required Preliminary Examinations or have begun enrolling in remedial coursework before they are permitted to present their first recital. If a recital or project is not completed during the same semester as registration, an IP (“In Progress”) grade is recorded. The IP grade is later replaced with the letter grade assigned by the faculty advisory committee, and the student does not need to register again for the same TMUS project.

Although the Dissertation Projects are numbered sequentially below, students are strongly encouraged to begin work on one of the non-recital projects (TMUS 8259 or 8269) during their second year in residence. For each non-recital project, the student should select one member of the faculty advisory committee to serve as the main advisor (not necessarily the committee chair), who guides the student in preparing a written prospectus, which is then submitted to the faculty advisory committee for their suggestions and approval. Before the student proceeds with the project, two members of the committee must agree to serve as first and second readers, who will guide the project to the final draft, which is then presented to the committee as a whole. The Research Lecture papers should be in their final form *before* the public presentation of each lecture.

**All TMUS courses are set up as variable credit. DO NOT register for more than the total number of credits required for each dissertation project.**
